

DHPC

IT IS TIME TO MAKE IT HAPPEN

DHPC what is it?

Bridging the gap towards digital transformation

As a result of the global pandemic the world is going through a process of accelerated change. The accelerated change is supported by the digital transformation.

At its core the digital transformation that we are experiencing is about using the latest technological or digital innovations to do the same things that we have been doing, only better.

Hyper-connectivity which refers to the transactions and interactions among people, businesses, devices, etc facilitates the process of digital transformation.

How to achieve hyper-connectivity?

- Electronic Communications Service Providers
- Data Centers
- Internet eXchange Point
- Content Delivery Networks
- Digital Service Providers
- Entrepreneurs
- Government Entities
 - Legislative Framework
 - Education
- Consumers/Clients

Curacao has all the above

- How can our existing assets be leveraged in support of a flourishing digital economy for Curacao?
 1. Have a common mission
 - “Enable businesses to co-create locally and deliver globally”
 2. Have a common vision
 - “Become the premier and trusted digital hub for the Caribbean”
 3. Have shared core values
 - “Innovation, co-creation, collaboration, and sustainability”

Digital Hub Platform Curacao (DHPC)

- We need to leverage our geographical position, electronic communication assets, human resources, and legislative frameworks to play a more important role in the Caribbean's participation in the digital economy.
- We need to keep in mind that the essence of a hub is to connect and facilitate
- DHPC must bring together the expertise of locally established companies with innovative concepts and professional ethics, with the objective to co-create new digital services for the Caribbean and beyond.

Digital Hub Platform Curacao

Who is needed?
